

The Periogen[®] Company Dental Health Bulletin

Periogen Awarded 'Best Dental Treatment 2017' By Global Health & Pharma (GHP)

The Periogen Company has been recognized by Global Health & Pharma (GHP) Magazine, a UK-based health care publication in its Biotechnology category Awards 2017. According to GHP Magazine, "Biotechnology is increasingly seen as being the frontline of medical science. GHP recognizes game-changing advances and developments that will form the foundation for advancement in the healthcare world for years to come". As such, Periogen has been recognized and entitled with 'Best Dental Treatment 2017' award.

For Periogen it is an honor to be recognized among this distinguished group, and we are delighted to be acknowledged for our commitment to work on the preventive part of public health dentistry, a vision sighted by Dr Paul H Keyes, the former Dental Director of the US National Institute of Health (NIH). This award will further boost our mission to maintain the standards of quality in our production and continue to offer excellent oral health care products to our customers.

Research Supports Periogen Again !!!

The results of yet another recently completed Periogen study were accepted and recently published in peer reviewed prestigious Journal of Biological Regulator and Haemostatic Agents. The study, "Anti-plaque and antimicrobial efficiency of different oral rinses in a 3-Day plaque accumulation model" was conducted jointly by the prestigious University of Bari Aldo Moro, Italy, University of Foggia, Italy and Tecnologica Research Institute, Crotona, Italy. This study investigated how Periogen compares with Chlorhexidine 0.12% in antimicrobial (germ killing) ability. Chlorhexidine 0.12% is the current "Gold Standard" in dentistry for treating gingivitis and other oral ailments related to infection.

This evaluation of antimicrobial activity was performed by saliva samples collected during 3 days of usage. The results of this study indicate that Periogen is equivalent to chlorhexidine in inhibiting plaque formation with no side effects observed during the study. The authors stated that "From a public health point of view, Periogen mouthwash can serve as a good alternative to avoid alcohol based products or those with artificial preservatives".

PRODUCT SAFETY: OUR TOP PRIORITY!

The safety of our product is and will always be our number one priority. We never compromise on the standards of our product. We have a new 100 second video that simply explains how Periogen is tested and how it has passed stringent parameters for quality assurance. You can see the video from our [home page](https://www.youtube.com/watch?v=lkpiYVcuQAE) (or at : <https://www.youtube.com/watch?v=lkpiYVcuQAE>
